

NEW
Permeable 3 $\frac{1}{4}$ " x 18"

Managing stormwater to minimize runoff

The need for a pervious concrete paving unit that allows water to permeate the soil has become increasingly important. With more and more paved areas such as streets, parking lots and sidewalks, rainwater has little opportunity to filtrate into the soil. Municipalities now require that stormwater runoff be managed and retained. Hanover's Permeable Paving Units allow for stormwater drainage and manage excessive runoff.

NEW Permeable 3 1/4" x 18"

3 1/4" x 18" x 4"
Actual Dimensions

Hanover's newest Permeable Paver, the Permeable 3 1/4" x 18", meets standards set forth by the Americans with Disabilities Act (ADA). With a 1/16" bevel, the Permeable 3 1/4" x 18" is available with a 4" thickness. Minimal openings provide a comfortable walking surface while allowing for water percolation. The Permeable 3 1/4" x 18" can accommodate wheel chair traffic making it the perfect choice for high foot traffic areas such as walkways, plazas and entrance ways.

Suggested for pedestrian use only, the 3 1/4" x 18" can be produced with a Natural, Tudor® or Chiseled finish. It is available in Hanover's full range of colors creating endless design options.

Hanover® Permeable Paving Units:

- EcoGrid®
- Aqua-Loc®
- Permeable 4" x 9" (4 5/8" x 9 1/4")
- Permeable 4" x 9" Scored
- Permeable 3 1/4" x 18"

Using Hanover's Permeable Paving Units can facilitate the process of obtaining LEED Green Building certification. Contact Hanover® for more information.
